Summary

With a strong foundation in threat detection, vulnerability assessment, incident response and penetration testing. Experienced in monitoring and analyzing security events with SIEM Platform, identifying vulnerabilities, and implementing real-time response protocols to mitigate potential risks. I am seeking to leverage analytical skills and knowledge of cybersecurity protocols to enhance the security posture of an innovative organization and support proactive threat defense. Holds a Bachelor's degree in Computer Science. Committed to staying updated with the latest Cyber security trends to ensure continuous improvement in security practices.

Skills

Network security, Endpoint security(EDR), Cloud Security, SIEM (Splunk), Vulnerability scanning, Penetration testing, Security event monitoring and analysis, Intrusion detection and prevention, Front-End Development, Digital Marketing

Experience

Goldie Agro Exporter
General Manager

Lagos, Nigeria
2015 - Present

- I focused on overseeing company operations, driving international growth, and ensuring efficient production and export processes.
- Risk Management and Problem Solving: Identified and mitigated risks in logistics, finance, and regulations, while promptly resolving operational challenges to maintain supply chain continuity and client satisfaction.
- Team Leadership: Recruited, trained, and mentored staff to build a high-performance team, established KPIs, and conducted performance evaluations to align with company goals.
- Marketing and Branding: Led branding initiatives in international markets, aligned marketing strategies with export goals, and collaborated with marketing teams to develop regional promotional materials and digital campaigns.
- Quality Assurance and Compliance: Ensured products met both local and international standards and collaborated with quality control teams to uphold quality from sourcing through to packaging.

CyberXpert LTD
Cyber Security Analyst

Remote
2022 - Present

- Monitored and analyzed security events and incidents from systems including Intrusion Detection Systems (IDS), SIEM platforms, and network traffic analyzers.
- Created and maintained detailed documentation, including incident reports, analysis findings, and standard operating procedures.
- Oversaw threat detection and mitigation strategies for critical infrastructure.
- Developed and implemented a threat detection system that reduced false positives by 60%.
- Collaborated with a team to enhance security protocols, achieving a 30% improvement in system resilience.
- Managed security assessments for 10 clients, ensuring compliance with industry standards and regulations.

Education

University of Lagos
BSC Computer Science

Lagos
2012-2016

Certification

CompTIA Security+

2024

Achievements

Collaborated with my team to reduce average incident response time by 25% through the deployment of automation and orchestration tools.
